

Alumni's Email Account

Starting with 2016 - 2017 graduates, graduating students are able to keep their ALBA Email mailbox, including all of the contents within it, for as long as they like.

This means you continue to send and receive email messages from your email address which will change to username@alumni.alba.edu.lb

Your mailbox storage space will still be 50 GB, and the University's spam and virus filtering service will continue to protect your email against viruses and junk messages.

And best yet, all of this will happen automatically!

For example, if you graduate at the end of June, you can continue to use your current primary student computing account just as you do now. After graduation, you will receive an automated email message informing you that your student account will be transitioning automatically to an Alumni account on a specific date.
